MODULE GUIDE

What each module does.

The everyday core first, then every department and specialty on the following pages: 82 documented modules, 37 of them in the next release.

MODULE	HIGHLIGHTS
Dashboard	What needs attention now (live), how the day is going, and how the hospital is doing, by role.
Patients	Registry, allergies, restricted records, gap-free patient numbers, search. Possible duplicates are found and can be linked; nothing is moved and the other record's history reads through.
Appointments	Booking, check-in and queue; the database guarantees no double-booking. Recurring series are booked all-or-none and cancelled together.
Encounter	SOAP notes with append-only revisions, vitals, signing, reasoned amendments, prescriptions with an honest safety report, revision of a draft prescription, note templates and structured chart forms.
Emergency	Tracking board, triage with decision support (a trained classifier plus safety rules), treatment and admission.
Wards and discharge	Bed maps, admit, transfer and discharge; a discharge command centre with milestones; nursing tasks; handover; medication reconciliation; virtual nursing.
Theatre	Rooms, people and equipment as resources; waitlist, readiness, running-late status, proposed changes and room blocks.

MODULE GUIDE, CONTINUED

MODULE	HIGHLIGHTS
Laboratory	Specimens, results against ranges, separate verification, critical alerts and acknowledgement, turnaround against targets you set, delta checks you define, home sample collection, analyser links through the integration hub.
Imaging	Orders, DICOM header registration with a wrong-patient guard, reading worklist with claim, report turnaround, scanners and use, typed dose against your reference levels, critical findings and follow-up tracking, external viewer link, a modality worklist as DICOM JSON.
Pharmacy	Expiry-first stock ledger, purchasing, dispensing in fills (part, completion, refill), returns, controlled drugs with a second-person witness and a register.
Billing and insurance	Exact money, tax rules as data, idempotent payments, refunds, pre-authorisation, claim cases, missing-charge capture, collections, payment terms and overdue.
Care between visits	Chronic-care programmes with a coach queue; treatment courses of repeated sessions; follow-up messaging; the patient portal with released results and visit summaries; video visits.
Integration hub	HL7 v2 and ASTM intake with a quarantine for messages that need a person, mapping suggestions, webhooks, read-only API keys, read-only FHIR R4.
Insights and AI	Eleven fixed metrics with charts and a table view; no generated SQL. AI drafts and assistants, all off by default, with named human review.
Governance and setup	Audit viewer with chain verification, break-glass review, privacy watch, facilities, wards, formulary, tax, payers and a first-run checklist.

Not built yet: transmission of prescriptions, a DICOM C-FIND service and MPPS, tumour-board meetings, a payment gateway, a live ABDM gateway connection, WhatsApp Business, patient self-booking, full translation of the interface, a released native mobile app (a first build exists and has never been run on a phone). Thresholds such as lab targets, delta rules, reference doses and payment terms are set by the organisation: none ship.

WARDS AND NURSING

Wards and nursing.

MODULE	WHAT IT DOES
Medication rounds	Nurses record each dose given on the ward, with who gave it and when, so nothing is missed or given twice.
Diet orders	A doctor or dietitian orders a patient's diet, and the kitchen and ward see one list of who gets what.
Bed cleaning	When a patient leaves, a cleaning job appears for the housekeeper, so beds are ready faster. Housekeepers see beds, never patients.
Day care	Same-day stays: booking, who escorts the patient home, a discharge readiness score, and turning the stay into an admission if needed.
Cath lab record	The record of a catheter procedure: safety checks, the pause before starting, devices and lot numbers, radiation dose and site checks.
Dialysis sessions	The prescription, each session with machine readings, and nurse sign-off.
Maternity and labour	Antenatal visits, labour charting with alerts outside safe ranges, the delivery summary and checks after birth.
Cancer treatment plans	Chemotherapy and radiotherapy plans, cycles, doses checked by a second clinician, and a running radiation total.
Home visits	Courses of nurse home visits, with concerns flagged for the doctor.
Nursing risk scales NEXT RELEASE	Falls, pressure sores, nutrition, pain, daily living and clot-risk scores with risk bands, reassessment reminders and a ward board.
Early warning scores NEXT RELEASE	A standard score from a patient's vital signs that raises one escalation task when it is high. Advice only.
Shift handover NEXT RELEASE	A structured handover (ISBAR) between staff that the receiver must acknowledge; corrections are new handovers.
Advance directives and code status NEXT RELEASE	A patient's wishes about resuscitation and care, kept as versions, with a banner on the chart and chips on the boards.
Elective waiting list NEXT RELEASE	Urgency categories, a clock that can pause, a forecast of who will breach their target, and a name-free report.
Capacity and safeguarding NEXT RELEASE	Mental-capacity assessments, legal authorisations, a restricted safeguarding log, and a restraint and seclusion register.
Infection control NEXT RELEASE	Hospital-acquired infection cases, isolation flags, hand-hygiene checks, colour-coded waste logs, and monthly rates.

DIAGNOSTICS, PHARMACY AND SUPPLIES

Diagnostics, pharmacy and supplies.

MODULE	WHAT IT DOES
Blood bank	Donors, units of blood, screening results and stock levels in one place.
Laboratory extras	Follows a specimen's journey, handles rejected specimens and tests sent outside, and records quality control.
Radiology extras	Scanner time slots, safety screening before a scan, and patient arrivals.
Pharmacy stock and sales	Goods received, reorder alerts, requests from wards and over-the-counter sales.
Supplier invoices	Supplier invoices matched to what was ordered and received, with tax split and payment.
Pharmacy customers	Walk-in customers, returns handled as credit notes, and saved sale templates.
Ward stock and controlled drugs	Stock levels on each ward, scanning barcodes, and a witnessed register of controlled drugs.
General stores	Non-drug supplies, requests from departments and a stock ledger.
Sterile services	Instrument sets, sterilisation loads and their indicators, issue to theatre, and recall if a load fails.
Reorder forecasting	Suggests what to order from past use, flags stock-outs and over-stock, and lists items near expiry.
Controlled-drug rules NEXT RELEASE	Drug schedules, prescriber registration numbers, numbered prescriptions with validity, and an inspector export approved by a second person.
Prescription documents NEXT RELEASE	A numbered prescription with the doctor's licence and a validity window, which a pharmacist verifies and dispenses once.
Medical terminology NEXT RELEASE	Concept lists the hospital is licensed to use, search, and links from lab tests and medicines to the standard codes.
Implants and device recalls NEXT RELEASE	A register of implanted devices by unique ID, matching safety notices to patients, and a report draft that is never sent.

RECORDS, IDENTITY AND PRIVACY

Records, identity and privacy.

MODULE	WHAT IT DOES
Medical records department	Tracks paper folders, codes and signs off discharged records, and handles requests for copies.
Diagnosis and procedure codes NEXT RELEASE	Loadable code sets with validity dates, search, and a coder queue where doctors answer coding queries.
Birth and death registration NEXT RELEASE	Birth notifications from the delivery record, and death certificates with the cause of death, verified by a second doctor.
National ID formats NEXT RELEASE	Checks the format of national IDs from Singapore, Malaysia, Thailand, Brazil, Chile and Saudi Arabia, and records a preferred name.
Professional registrations NEXT RELEASE	Clinician licences and facility registrations with expiry. Format checked only; never verified with the regulator.
Medical certificates NEXT RELEASE	Numbered sick-leave, fitness, travel and visa certificates anyone can verify with a code.
Patient summary export NEXT RELEASE	A patient's summary in the international format, issued only with consent and logged. Nothing is sent anywhere.
Records retention NEXT RELEASE	A register of how data is used, retention rules, legal holds, and disposal certificates signed by two people. Nothing is deleted.
Who was given a patient's record NEXT RELEASE	A ledger of disclosures with a multi-year accounting, a log of items held back from the portal, and portal release rules.
Privacy requests and breaches NEXT RELEASE	A register for patients' requests about their data, with due dates and identity checks, plus a breach register with deadlines.
Medico-legal cases NEXT RELEASE	Injury findings, police intimation, sealed samples with chain of custody; doctors only and never edited.
Language access NEXT RELEASE	A patient's preferred language, an interpreter-needed flag and request log, and draft Arabic and Hindi screens with right-to-left layout.
Health record sharing	A patient's health address, consents and a log of shared records. Local only; no connection to the national gateway.

MONEY AND STATUTORY RULES

Money and statutory rules.

MODULE	WHAT IT DOES
Doctor payouts	Works out each doctor's share of collected visit fees and records paying it.
Money owed by insurers	What each insurer owes, how old it is, payments received and write-offs.
Employer accounts	Employers send staff for health checks and see their own account, through their own limited portal.
Supplier bills	A bill is entered, approved by a different person, then paid once.
Discounts and fee waivers NEXT RELEASE	Statutory discounts and exemptions with evidence, approved by a second person, and checked before discharge.
Mobile money payments NEXT RELEASE	Records mobile-money receipts, matches them to a statement file, and gives a daily till report.
Price lists and estimates NEXT RELEASE	Insurer rate cards and a self-pay price list by room class, and a labelled estimate for the front desk.
Tax invoices NEXT RELEASE	Tax IDs and a tax category on every line, credit notes that chain to the invoice, and unsigned export files.
Insurance claim files NEXT RELEASE	Insurer file layouts as data, batches checked before export, insurer payment files imported by hand, and denials with an appeal trail.
Case-mix grouping NEXT RELEASE	Groups discharged stays by rules you load, with case-mix index and length of stay against benchmark. A model, not an official grouper.
Government scheme billing NEXT RELEASE	Public schemes with co-pay, caps and packages, enrolment, splitting a bill between scheme and patient, and balance alerts.

OPERATIONS, PEOPLE AND SAFETY

Operations, people and safety.

MODULE	WHAT IT DOES
Buildings and equipment	A register of plant and equipment, scheduled maintenance, and breakdown jobs from reported to done.
Staff licences and attendance	Staff licences and certificates with expiry dates, clocking in and out, and corrections.
Staff rota and leave	Shifts and leave for staff.
Self check-in kiosks	Patients check themselves in with a one-time code and their date of birth. Each kiosk can be switched off at once.
Queue tickets	Numbered tickets for the waiting room and a display that shows whose turn it is.
Patient feedback	Patients rate their visit, and managers see which areas need attention.
Ambulance dispatch	Calls, sending a vehicle, the timeline of each trip and which vehicles are ready.
Ambulance care record	The crew's record of care in the vehicle, the handover at the emergency department, and an alert before arrival.
Referrals and transfers	Send a patient to another facility in the same organisation, with accept, decline and return.
Patient-safety incidents	Anyone can report a near miss or harm event; managers triage, investigate and close it.
Serious event review NEXT RELEASE	Open conversations with the patient or family, corrective actions, and a formal review with sign-off.
IT safety and downtime drills NEXT RELEASE	A self-assessment of IT safety, a record of downtime drills, and printable paper forms for when systems are down.
Bed and staffing forecast	Predicts occupied beds and emergency arrivals, shows how wrong past forecasts were, and flags days the rota falls short.
Bedside device readings	Bedside monitors send readings that attach to the right patient, with alerts for critical values.
Device alerts and trends	Per-patient and children's alert limits, alerts when a device goes silent, trends, and infusion pumps and ventilators.

INSIGHT AND PUBLIC HEALTH

Insight and public health.

MODULE	WHAT IT DOES
Hospital scorecard	One page of totals across the departments, with no patient names.
Saved dashboards	Build and share dashboards, compare periods, set targets and export figures.
Anonymous data exports	Counts exported as files with no names or identifiers, and small groups left out.
Quality and accreditation readiness NEXT RELEASE	Live quality measures, your own accreditation checklist with evidence, and mock-audit findings. Not an accreditation.
Antibiotic resistance	Which germs resist which antibiotics, rates by ward and period, and a signal when cases cluster.
Notifiable diseases NEXT RELEASE	The hospital's list of diseases it must report, with deadline clocks, a case queue and an anonymous list for the health authority.
Health statistics report NEXT RELEASE	Monthly counts mapped to national indicator IDs, approved by a second administrator, then downloaded as a file.
HIV, TB and malaria follow-up NEXT RELEASE	Register templates, contact lists, and a list of patients who missed follow-up with logged attempts to reach them.
Immunisation schedules NEXT RELEASE	The hospital's own schedule, who is due or overdue, doses given and wasted, and a printable child health card.
Telemedicine rules NEXT RELEASE	Consent and visit type recorded for each tele-visit, the doctor's registration shown, and prescribing limited to an approved list.

EVERYDAY AND BRANDING

Everyday and branding.

MODULE	WHAT IT DOES
Your name and colour	Your organisation's name and accent colour on screens and documents.
Starred patients	A private shortcut list of patients you follow.
Thank-yous	Colleagues can send each other thanks.
